# TECHNOLOGY AND INNOVATION REPORT 2021

*Innovation with equity*

## The role of civil activism

**What is the impact of frontier technologies on inequalities?**

**What is the role of civil society organizations to ensure that these technologies accelerate the SDGs' progress while leaving no one behind?**

**How can international cooperation help?**

*The answer to these questions is critical for the achievement of the Sustainable Development Goals.*

*The Technology and Innovation Report 2021* critically examines the possibility that frontier technologies such as artificial intelligence, robotics and gene editing could widen existing inequalities and create new ones.

The webinar will serve as a platform for peer learning by discussing and disseminating inclusive innovation strategies that are being explored by civil society organizations, governments, development partners, and other stakeholders.

Opening remarks

Presentation of the  
Technology and  
Innovation Report 2021  
Panelists

Moderated by
